

enLink

enLighten's Linkable Lighting System

IMPROVE SITE SAFETY USING A FLEXIBLE AND MOVABLE LIGHTING SOLUTION FOR EGRESS ROUTES AND WORK AREAS

Lighting requirements on a construction site are ever-changing. enLighten's enLink System is a robust plug-and-play solution for emergency and non-emergency luminaires.

enLink is a fast fit device that allows for both vertical and/or horizontal luminaire connection. Our lights have been designed to perform in harsh environments with an IP65 and IK10 rating.

Using enLighten's enLink Lighting System means you save on installation time, labour and material costs whilst improving site safety.

Perfect for temporary lighting systems or where long runs of lighting & emergency lighting are required

PLUG-AND-PLAY CONNECTIONS

Quicker installation, save on labour and material costs

SAFER INSTALLATION

One way plug-and-play connections eliminates electrical faults

SUSTAINABLE

Re-usable leads and luminaires
